**Finished For You**

## A customised service tailored to meet your unique requirements

The human body is host to trillions of microorganisms collectively known as the human microbiota. It is increasingly recognized that psychological, environmental, and physical factors may have variable effects on microbiota composition and function<sup>(1)</sup>. Life's stressors and challenges can therefore significantly impact our microbiota. That's why we've meticulously crafted specialized probiotic blends for various conditions, supported by scientific research. Our strains work effectively to promote enhanced general wellbeing by rebalancing and maintaining a healthy bacterial balance across the body's multiple microbiomes.

Sacco System is now offering the Finished for You service. This service is designed to assist our clients in the formulation and production of finished products in various formats. Whether you need capsules, powders, or liquids, our team of experts will take care of every step, ensuring that your products meet the highest standards of quality and efficacy to satisfy your clients.

Finished for you advantages:

### Rapid Market Entry

The fastest way to get into the supplement market, ensuring an immediate launch.

### Innovation

Offering service reliability, research and innovation, knowledge sharing, flexibility and customization.

### Efficiency

Sacco System takes the manufacturing supply chain and regulatory concerns off your hands.

### Quality

High quality Probiotic formulations developed and backed by gold standard scientific evidence, enhanced with innovative ingredients to promote a synbiotic effect.

### Natural and hypoallergenic

Gluten and lactose free, GMO Free and vegan friendly catering to health-conscious consumers

**Stability** – 24-month Shelf-life, without refrigeration, provided the product is kept in a cool, dry place out of direct sunlight.
